Cyber Accountability Report Launch: 
Models, Mechanisms, and Multistakeholder Approaches

Tuesday, 9 July 2024, 13:15 – 14:30 ET
Permanent Mission of Canada to the United Nations (466 Lexington Ave 20th floor, New York, NY 10017, United States)

Since 2022, Stimson’s Cyber Program has been researching the implementation of international norms and law in other international threat areas such as conventional arms control; the regulation of chemical, biological, radiological, and nuclear materials; management of the private military and security industry; and military uses of outer space, to cite a few examples. Stimson’s program has also examined various dimensions of cyber accountability through a webinar series, in-person convenings and events, and a collaboration with the EU Institute for Security Studies (EU ISS).

The culmination of this work is the release of a major research report focused on the concept of accountability and how it might be applied to malicious activity in cyberspace to create more positive incentive structures and better deter dangerous, disruptive, and destructive behavior. The report, titled Advancing Accountability in Cyberspace: Models, Mechanisms, and Multistakeholder Approaches consists of ten case studies and a series of overarching conclusions intended to provide policymakers and other stakeholders in the cyber community with a “toolkit” of policy approaches that have already been tried and tested in other contexts. It seeks to offer potential pragmatic paths forward to enhance accountability in the cyber domain, and thereby improve deterrence of malicious cyber activities.

EVENT INFORMATION

Please RSVP by 12:00 EST on Friday, 5 July to Shreya Lad (slad@stimson.org) with your name and affiliation (organization/government). Lunch will be provided.

Speakers:
- Allison Pytlak, Cyber Program Lead, The Stimson Center
- Kerry-Ann Barrett, Cybersecurity Program Manager within the Inter-American Committee Against Terrorism, Organization of American States
- Danielle Yeow, Lead, Cyber Law and Governance, Centre for International Law, National University of Singapore
- Jérôme Barbier, Head of Outer Space, Digital and Economic Issues, Paris Peace Forum (invited)
- Anne-Marie Buzatu, Executive Director, ICT4Peace (Moderator)
